

SINEMA RC from private Cloud

Certified Hosting with ComNet in Germany

If you do not want to host your SIEMENS SINEMA Remote Connect Server by yourself – ComNet has the solution.

As Siemens Partner for industrial communication ComNet provides to swap your SINEMA RC platform into a high availability datacenter. ComNet, as the owner of the datacenter located in Aachen, affords a safe solution for running a SINEMA RC Remote Connect Server by highest security aspects.

About ComNet:

In more than 25 years on the market ComNet has acquired its profile as a consulting and implementation IT partner for SMEs. As a SME we know itself only too well to the specific needs of small oder medium sized enterprise. We are aware of the special needs of SMEs.

We have given our data center a name: **PrivateCloud.**

Only ComNet customers, maximum reliability, complete redundancy and maximum flexibility are the four promises that we can only back with our own infrastructure and where we differ from numerous market companions.

We are your IT!

ComNet Computer im Netzwerk Vertriebs GmbH | Carlo-Schmid-Str. 15 | D-52146 Würselen
Phone: +49 (0) 2405/4888-0 | Fax: +49 (0) 2405/4888-100
Web: www.comnet.de | eMail: info@comnet.de
CEOs: Bernd Schmitz, Holger Schmitz | AG Aachen HRB 4463 | Credit.-Id.-Nr.: DE 121740315

Advantages:

- Deployment within 4 hours after ordering
- No hardware necessary
- No setup costs
- Independent from IT Department
- No changes in Firewall / Router necessary
- Upload and Download synchronous
- Redundant Internet Connection via fibre to multiple providers
- VMWare High Availability Cluster
- Automatic Backup every night. Backups will be stored for 30 days
- ComNet has no access to the data of SINEMA RC

Every customer gets his own dedicated virtual Machine with fixed IP and DNS Name (e.g. DNS-Name: customerA.sierc.de) for running SIEMENS SINEMA Remote Connect Server in high availability data center.

SINEMA RC from private Cloud
